WE CREATE SUSTAINABLE VALUES

FrymaKoruma  Stephan  Terlet
SUSTAINABILITY AT PROXES.

We aim to develop smart processing together with our customers in order to create sustainable value. That is our vision. As an agile partner, we enable our customers to process application ideas into desirable and sustainable products. That is our mission.

Together with our values, first and foremost customer centricity and curiosity, we have thus set clear guidance for our sustainability strategy and approach.

Sustainability is an integral part of our corporate strategy and is firmly anchored in our culture. We strive to harmonise ecological and economic goals and to create fair working conditions for our approximately 450 employees.

SUSTAINABILITY AS A PRINCIPLE - FOR BUSINESS ACTIVITIES AND PRODUCTS

In addition to the targeted integration of sustainability into our processes, we focus on two strategic fields of action: Product Design & Lifecycle and Impact of Operations. Our greatest leverage to contribute to sustainable development lies in working together with our customers and suppliers to become better. In concrete terms, this means that we are constantly working to optimise our products and our customers’ processes in terms of resource and energy efficiency.

"We want to create sustainable values – for our employees, customers, investors, and society." - Marc Setzen, CEO ProXES

WE ARE COMMITTED TO THE SUSTAINABLE DEVELOPMENT GOALS OF THE UNITED NATIONS

Promotion of health, safety and well-being and employee surveys.
Innovations for sustainable and modular design, buy-back and refurbishment of machines, waste reduction through recycling.
Use of renewable energy and energy saving measures.

WE MAKE OUR ACTIONS VISIBLE

We see sustainability as a commitment to continuous improvement and as a precondition for our long-term success. We want to make this visible to the public and provide transparent information about our goals, measures, and both our positive and negative developments.

INTEGRATING SUSTAINABILITY PRINCIPLES

Our investor Capvis has been supporting the initiative to systematise sustainability management since 2022 and our further goal to link it to our corporate strategy. We will make our sustainability activities comprehensively transparent in the future: from 2023, we will expand our existing ESG reporting and from 2025, we will report in accordance with a global standard.

1) HQ and production sites (PRX, STM, FKA, PRT) - Scope 1 decreased from 533 tCO2e (2021) to 442 tCO2e (2022) (-17 %) - Scope 2 decreased from 160 tCO2e (2021) to 144 tCO2e (2022) (-10 %)
2) Group-wide (2022) - 3) Number of employees
EXCELLENCE IS A TEAM EFFORT

With three leading brands FrymaKoruma, Stephan and Terlet under one roof, ProXES combines long-standing expertise with a challenger mindset. As an agile partner, we support our customers from first product concept to the implementation of a successful production process.

At ProXES, we believe in the power of co-creation: We’re here to listen, learn and advise. In close collaboration with our customers, we merge their ideas and our technologies into innovative processes and tailor-made solutions that help them align the quality, energy efficiency and profit of their production.

With standalone machines, modern process lines, advanced automation and service concepts, ProXES drives the business of customers in the food, pharmaceutical, cosmetics and advanced materials industries. What about you? Let’s create value together – sustainably!

FROM INSPIRATION TO FEASIBILITY

Our process technology and training centre is a space to try out new ideas. Here you can develop or improve formulas in a professionally equipped laboratory, test any kind of machine, perform scale-ups and produce test batches. You will receive expert advice and support on all the capabilities of the technical equipment and modifications.
